1550027
(PWS #s)

MAY 13th, 2024
(Date)

Section I: Declaration of Policy, Purpose, and Intent

In order to conserve the available water supply and protect the integrity of water supply facilities, with particular regard for domestic water use, sanitation, and fire protection, and to protect and preserve public health, welfare, and safety and minimize the adverse impacts of water supply shortage or other water supply emergency conditions, the LTG WSC hereby adopts the following regulations and restrictions on the delivery and consumption of water through an ordinance/or resolution.

Section II: Public Involvement

Opportunity for the public to provide input into the preparation of the Plan was provided by the LTG WSC by means of scheduling and providing public notice of a public meeting to accept input on the plan.

The meeting will take place at: 312 COMMERCE ST, LEROY, TX 76654

Date: JUNE 11, 2009 Time: 7:00 p.m. Location: CORPORATION'S OFFICE

Notice will be posted at the Leroy and Elm Mott Post Offices and on the Corporation's office door. Notice will also be posted at the McLennan County Court House and at M&S Grocery in Leroy, TX.

Section III: Public Education

The LTG WSC will periodically provide the public with information about the Plan, including information about the conditions under which each stage of the Plan is to be initiated or terminated and the drought response measures to be implemented in each stage. This information will be provided by means of public meeting, press releases, utility bill inserts, and/or public postings.

Section IV: Coordination with Regional Water Planning Groups

The service area of the LTG WSC is located within the Brazos G and LTG WSC has provided a copy of this Plan to the Brazos G.

(Section 4 will be done when the Plan is fully completed.)

Section V: Authorization

The Board President, or his/her designee is hereby authorized and directed to implement the applicable provisions of this Plan upon determination that such implementation is necessary to protect public health, safety, and welfare. The Board President, or his/her designee shall have the authority to initiate or terminate drought or other water supply emergency response measures as described in this Plan.

Section VI: Application

The provisions of this Plan shall apply to all persons, customers, and property utilizing water provided by the LTG WSC. The terms "person" and "customer" as used in the Plan include individuals, corporations, partnerships, associations, and all other legal entities. Any wholesale purchasers must also abide by LTG WSC drought contingency plan.

Section VII: Definitions

For the purposes of this Plan, the following definitions shall apply:

Aesthetic water use: water use for ornamental or decorative purposes such as fountains, reflecting pools, and water gardens.

Commercial and institutional water use: water use which is integral to the operations of commercial and non-profit establishments and governmental entities such as retail establishments, hotels and motels, restaurants, and office buildings.

Conservation: those practices, techniques, and technologies that reduce the consumption of water, reduce the loss or waste of water, improve the efficiency in the use of water or increase the recycling and reuse of water so that a supply is conserved and made available for future or alternative uses.

Customer: any person, company, or organization using water supplied by LTG WSC.

Domestic water use: water use for personal needs or for household or sanitary purposes such as drinking, bathing, heating, cooking, sanitation, or for cleaning a residence, business, industry, or institution.

Even number address: street addresses, box numbers, or rural postal route numbers ending in 0, 2, 4, 6, or 8.

Industrial water use: the use of water in processes designed to convert materials of lower value into forms having greater usability and value.

Landscape irrigation use: water used for the irrigation and maintenance of landscaped areas, whether publicly or privately owned, including residential and commercial lawns, gardens, golf courses, parks, and rights-of-way and medians.

Non-essential water use: water uses that are not essential nor required for the protection of public, health, safety, and welfare, including:

- (a) irrigation of landscape areas, including parks, athletic fields, and golf courses, except otherwise provided under this Plan;
- (b) use of water to wash any motor vehicle, motorbike, boat, trailer, airplane or other vehicle;
- (c) use of water to wash down any sidewalks, walkways, driveways, parking lots, tennis courts, or other hard-surfaced areas;
- (d) use of water to wash down buildings or structures for purposes other than immediate fire protection;
- (e) flushing gutters or permitting water to run or accumulate in any gutter or street;
- (f) use of water to fill, refill, or add to any indoor or outdoor swimming pools or Jacuzzi-type pools;
- (g) use of water in a fountain or pond for aesthetic or scenic purposes except where necessary to support aquatic life;
- (h) failure to repair a controllable leak(s) within a reasonable period after having been given notice directing the repair of such leak(s); and
- (i) use of water from hydrants for construction purposes or any other purposes other than fire fighting.

Odd numbered address: street addresses, box numbers, or rural postal route numbers ending in 1, 3, 5, 7, or 9.

Subsistence Garden: a garden used for the subsistence of the residents of the household, the produce of which is predominantly consumed by the residents.

Section VIII: Criteria for Initiation and Termination of Drought Response Stages

The Board President or designee(s) shall monitor water supply and/or demand conditions on a daily water demand basis and shall determine when conditions warrant initiation or termination of each stage of the Plan, that is, when the specified targets are reached. The Board President may designate the Operator, Field Manager, and Office Manager to determine stage conditions as a majority vote. The Board President has the authority to override the decision by the designees.

Stage 1 Trigger -- MILD Water Shortage Conditions

Requirements for initiation

Customers shall be requested to voluntarily conserve water and adhere to the prescribed restrictions on certain water uses, defined in Section VII Definitions:

Annually, beginning on May 1 through September 30, however, Stage I restrictions may extend beyond these parameters if conditions warrant.

Requirements for termination

Stage 1 of the Plan may be rescinded when all the conditions listed as triggering events have ceased to exist for a period of seven (7) consecutive days.

Stage 1 Response -- MILD Water Shortage Conditions

Best Management Practices for Supply Management:

Reduced flushing of water mains, activation and use of an alternative supply source(s).

Voluntary Water Use Restrictions for Reducing Demand:

- (a) Water customers are requested to voluntarily limit the irrigation of landscaped areas to Sundays and Thursdays for customers with a street address ending in an even number (0, 2, 4, 6 or 8), and Saturdays and Wednesdays for water customers with a street address ending in an odd number (1, 3, 5, 7 or 9). Irrigation of landscape is prohibited between the hours of 10:00 am to 8:00 pm on designated watering days. Note- No function of a properly operating septic system such as septic sprinklers or pumps shall be regulated.

Residential Account Last Digit of Address	Allowed Outdoor Water Days
---	----------------------------

Odd	Wednesday and Saturday
Even	Sunday and Thursday

- (b) All operations of the L-T-G WSC shall adhere to water use restrictions prescribed for Stage 2 of the Plan.
- (c) Water customers are requested to practice water conservation and to minimize or discontinue water use for non-essential purposes.

Stage 1 Goal -- Achieve a voluntary 15 percent reduction in daily water demand.

Stage 2 Trigger -- MODERATE Water Shortage Conditions

Requirements for initiation

Customers shall be required to comply with the requirements and restrictions on certain non-essential water uses provided in Section VII of this Plan when:

- a. Pump hours per day: over 10 hours
- b. Continually falling treated water reservoir levels which do not refill overnight.
- c. Production or distribution limitations.

Requirements for termination

Stage 2 of the Plan may be rescinded when all of the conditions listed as triggering events have ceased to exist for a period of seven (7) consecutive days. Upon termination of Stage 2, Stage 1 becomes operative.

Stage 2 Response -- MODERATE Water Shortage Conditions

Best Management Practices for Supply Management:

Additional measures, if any, to be implemented directly by L-T-G WSC to manage limited water supplies and/or reduce water demand. Reduced flushing of water mains, reduced or discontinued irrigation of public landscaped areas; use of an alternative supply source(s). Provide customers with a list of water conservation measures and additional notices and news releases.

LTG WSC shall monitor “excessive watering” and “inefficient watering”, and issue notifications to customers. “Excessive watering” occurs where run-off extends for a distance greater than ten (10) feet from the point of use where there is washing or hosing down of buildings, sidewalks, driveways, patios, porches, parking surfaces or other paved surfaces. “Inefficient watering” includes but is not limited to overflowing water troughs or containment; leaking troughs, containment, or water lines; or constantly running or dripping water lines or faucets.

Water Use Restrictions for Demand Reduction:

Under threat of penalty for violation, the following water use restrictions shall apply to all persons:

- (a) Irrigation of landscaped areas with hose-end sprinklers or automatic irrigation systems shall be limited to Sundays and Thursdays for customers with a street address ending in an even number (0, 2, 4, 6 or 8), and Saturdays and Wednesdays for water customers with a street address ending in an odd number (1, 3, 5, 7 or 9). Irrigation of landscape is prohibited between the hours of 10:00 am to 8:00 pm on designated watering days. However, irrigation of landscaped areas is permitted at any time if it is by means of a hand-held hose, a faucet filled bucket or watering can of five (5) gallons or less, or drip irrigation system.
Note- No function of a properly operating septic system such as septic sprinklers or pumps shall be regulated.

Residential Account Last Digit of Address	Allowed Outdoor Water Days
Odd	Wednesday and Saturday
Even	Sunday and Thursday

- (b) Use of water to wash any motor vehicle, motorbike, boat, trailer, airplane or other vehicle is prohibited between the hours of 10:00 am to 8:00 pm on designated watering days. Such washing, when allowed, shall be done with a hand-held bucket or a hand-held hose equipped with a positive shutoff nozzle for quick rises. Vehicle washing may be done at any time on the immediate premises of a commercial car wash or commercial service station. Further, such washing may be exempted from these regulations if the health, safety, and welfare of the public is contingent upon frequent vehicle cleansing, such as garbage trucks and vehicles used to transport food and perishables.
- (c) Use of water to fill, refill, or add to any indoor or outdoor swimming pools, wading pools, or Jacuzzi-type pools is prohibited between the hours of 10:00 am to 8:00 pm on designated watering days.
- (d) Operation of any ornamental fountain or pond for aesthetic or scenic purposes is prohibited except where necessary to support aquatic life or where such fountains or ponds are equipped with a recirculation system.
- (e) Use of water from hydrants shall be limited to firefighting, related activities, or other activities necessary to maintain public health, safety, and welfare, except that use of water from designated fire hydrants for construction purposes may be allowed under special permit from the L-T-G WSC.
- (f) Use of water for the irrigation of golf course greens, tees, and fairways is prohibited

between the hours of 10:00 am to 8:00 pm on designated watering days. However, if the golf course utilizes a water source other than that provided by the L-T-G WSC, the facility shall not be subject to these regulations.

(g) All restaurants are prohibited from serving water to patrons except upon request of the patron.

(h) The following uses of water are defined as non-essential and are prohibited:

1. Wash down of any sidewalks, walkways, driveways, parking lots, tennis courts, or other hard-surfaced areas.
2. Use of water to wash down buildings or structures for purposes other than immediate fire protection.
3. Use of water for dust control.
4. Flushing gutters or permitting water to run or accumulate in any gutter or street; and
5. Failure to repair a controllable leak(s) within a reasonable period after having been given notice directing the repair of such leak(s).

Stage 2 Goal -- Achieve a 20 percent reduction in daily water demand.

Stage 3 Trigger -- SEVERE Water Shortage Conditions

Requirements for initiation

Customers shall be required to comply with the requirements and restrictions on certain non-essential water uses for Stage 3 of this Plan when:

- a. Pump hours per day: over 16 hours.
- b. Any storage tank that fails to fill to the 15 foot level overnight.
- c. Production or distribution limitations.

Requirements for termination

Stage 3 of the Plan may be rescinded when all of the conditions listed as triggering events have ceased to exist for a period of seven (7) consecutive days. Upon termination of Stage 3, Stage 2 becomes operative.

Stage 3 Response -- SEVERE Water Shortage Conditions

Best Management Practices for Supply Management:

Additional measure to be implemented directly by L-T-G WSC to manage limited water supplies and/or reduce water demand. Reduced or discontinued flushing of water mains, reduced or discontinued irrigation of public landscaped areas; use of an alternative supply source(s).

LTG WSC shall monitor “excessive watering” and “inefficient watering”, and issue notifications to customers. “Excessive watering” occurs where run-off extends for a distance greater than ten (10) feet from the point of use where there is washing or hosing down of buildings, sidewalks, driveways, patios, porches, parking surfaces or other paved surfaces. “Inefficient watering” includes but is not limited to overflowing water troughs or containment; leaking troughs, containment, or water lines; or constantly running or dripping water lines or faucets.

Water Use Restrictions for Demand Reduction:

All requirements of Stage 2 shall remain in effect during Stage 3 except:

- (a) Irrigation of landscape is prohibited between the hours of 10:00 am to 8:00 pm on designated watering days. Water usage shall be by means of hand-held hoses, hand-held buckets, drip irrigation, or permanently installed automatic sprinkler system only. The use of hose-end sprinklers is prohibited at all times.
Note- No function of a properly operating septic system such as septic sprinklers or pumps shall be regulated.

Residential Account Last Digit of Address	Allowed Outdoor Water Days
Odd	Wednesday and Saturday
Even	Sunday and Thursday

- (b) The watering of golf course tees is prohibited unless the golf course utilizes a water source other than that provided by the L-T-G WSC.
- (c) The use of water for construction purposes from designated fire hydrants under special permit is to be discontinued.

Stage 3 Goal -- Achieve a 25 percent reduction in daily water demand.

Stage 4 Trigger -- CRITICAL Water Shortage Conditions

Requirements for initiation

Customers shall be required to comply with the requirements and restrictions on certain non-essential water uses for Stage 4 of this Plan when:

- a. Pump hours per day: over 20 hours.
- b. Production or distribution limitations or equipment failures.
- c. Any storage tank that falls below the 10 foot level overnight or any plant that has less than 40psi of pressure for over 15 minutes.
- d. If limitations or equipment repair takes longer than 4 hours, remaining time to production

will be assessed. If more than 4 additional hours expected, enter stage 4. If 8 hour repair time will be realized without completion of repair, enter stage 4.

Requirements for termination

Stage 4 of the Plan may be rescinded when all of the conditions listed as triggering events have ceased to exist for a period of seven (7) consecutive days. Upon termination of Stage 4, Stage 3 becomes operative.

Stage 4 Response -- CRITICAL Water Shortage Conditions

Best Management Practices for Supply Management:

Additional measures to be implemented directly by L-T-G WSC to manage limited water supplies and/or reduce water demand. Reduced or discontinued flushing of water mains, reduced or discontinued irrigation of public landscaped areas; use of an alternative supply source(s). Any wasteful use of water, Member will be notified and will be penalized \$50.00 on the next water bill.

LTG WSC shall monitor “excessive watering” and “inefficient watering”, and issue notifications to customers. “Excessive watering” occurs where run-off extends for a distance greater than ten (10) feet from the point of use where there is washing or hosing down of buildings, sidewalks, driveways, patios, porches, parking surfaces or other paved surfaces. “Inefficient watering” includes but is not limited to overflowing water troughs or containment; leaking troughs, containment, or water lines; or constantly running or dripping water lines or faucets.

Water Use Restrictions for Reducing Demand:. All requirements of Stage 2 and 3 shall remain in effect during Stage 4 except:

- (a) Irrigation of landscape is prohibited between the hours of 10:00 am to 8:00 pm on designated watering days. Irrigation shall be by means of hand-held hoses, hand-held buckets, or drip irrigation only. The use of hose-end sprinklers or permanently installed automatic sprinkler systems are prohibited at all times.
Note- No function of a properly operating septic system such as septic sprinklers or pumps shall be regulated.

Residential Account Last Digit of Address	Allowed Outdoor Water Days
Odd	Wednesday and Saturday
Even	Sunday and Thursday

- (b) Use of water to wash any motor vehicle, motorbike, boat, trailer, airplane or other vehicle not occurring on the premises of a commercial car wash and commercial service stations and not in the immediate interest of public health, safety, and welfare is prohibited. Further, such vehicle washing at commercial car washes and commercial service stations shall occur only between the hours of 6:00 a.m. and 10:00 a.m. and between 6:00 p.m. and 10 p.m.
- (c) The filling, refilling, or adding of water to swimming pools, wading pools, and Jacuzzi-type pools is prohibited.
- (d) Operation of any ornamental fountain or pond for aesthetic or scenic purposes is prohibited except where necessary to support aquatic life or where such fountains or ponds are equipped with a recirculation system.
- (e) No application for new, additional, expanded, or increased-in-size water service connections, meters, service lines, pipeline extensions, mains, or water service facilities of any kind shall be approved, and time limits for approval of such applications are hereby suspended for such time as this drought response stage or a higher-numbered stage shall be in effect.

Stage 4 Goal -- Achieve a 25 percent reduction in daily water demand.

Stage 5 Trigger -- EMERGENCY Water Shortage Conditions

Requirements for initiation

Customers shall be required to comply with the requirements and restrictions for Stage 5 of this Plan when Board President, or his/her designee, determines that a water supply emergency exists based on:

1. Major water line breaks, or pump or system failures occur, which cause unprecedented loss of capability to provide water service; **or**
2. Natural or man-made contamination of the water supply source(s).

Requirements for termination

Stage 5 of the Plan may be rescinded when all of the conditions listed as triggering events have ceased to exist for a period of seven (7) consecutive days.

Stage 5 Response -- EMERGENCY Water Shortage Conditions

Best Management Practices for Supply Management:

Additional measures to be implemented directly by L-T-G WSC to manage limited water supplies and/or reduce water demand: Discontinued flushing of water mains, discontinued irrigation of public landscaped areas; use of an alternative supply source(s).

Water being supplied to each Member may be limited to a fixed percentage of each such Member's use in the prior month, the percentage to be applied on a system-wide basis, with each Member being notified of this percentage amount.

LTG WSC shall monitor "excessive watering" and "inefficient watering", and issue notifications to customers. "Excessive watering" occurs where run-off extends for a distance greater than ten (10) feet from the point of use where there is washing or hosing down of buildings, sidewalks, driveways, patios, porches, parking surfaces or other paved surfaces. "Inefficient watering" includes but is not limited to overflowing water troughs or containment; leaking troughs, containment, or water lines; or constantly running or dripping water lines or faucets.

Water Use Restrictions for Reducing Demand. All requirements of Stage 2, 3, and 4 shall remain in effect during Stage 5 except:

- (a) Irrigation of landscaped areas is absolutely prohibited, except subsistence gardens may be sustained by directly applying water with handheld containers only.
Note- No function of a properly operating septic system such as septic sprinklers or pumps shall be regulated.
- (b) Use of water to wash any motor vehicle, motorbike, boat, trailer, airplane or other vehicle is absolutely prohibited.

Stage 5 Goal -- Achieve a 25 percent reduction in daily water demand.

Stage 6 Trigger -- WATER ALLOCATION

Requirements for initiation

Customers shall be required to comply with the water allocation plan prescribed in Section IX of this Plan and comply with the requirements and restrictions for Stage 5 of this Plan when:

- a. Any storage tank falls below the cut-on electrodes.
- b. Production or distribution limitations or equipment failures.
- c. Power outage expected for long durations.

Requirements for termination - Water allocation may be rescinded when all of the conditions listed as triggering events have ceased to exist for a period of seven (7) consecutive days.

Note: The inclusion of WATER ALLOCATION as part of a drought contingency plan may not be required in all cases. For example, for a given water supplier, an analysis of water supply availability under drought of record conditions may indicate that there is essentially no risk of water supply shortage. Hence, a drought contingency plan for such a water supplier might only address facility capacity limitations and emergency conditions (example: supply source contamination and system capacity limitations).

Stage 6 Response -- WATER ALLOCATION

In the event that water shortage conditions threaten public health, safety, and welfare, the The Board President is hereby authorized to allocate water according to the following water allocation plan:

Single-Family Residential Customers

The allocation to residential water customers residing in a single-family dwelling shall be as follows:

Persons per Household	Gallons per Month
1 or 2	6,000
3 or 4	7,000
5 or 6	8,000
7 or 8	9,000
9 or 10	10,000
11 or more	12,000

“Household” means the residential premises served by the customer’s meter. “Persons per household” include only those persons currently physically residing at the premises and expected to reside there for the entire billing period. It shall be assumed that a particular customer’s household is comprised of two (2) persons unless the customer notifies the LTG WSC of a greater number of persons per household on a form prescribed by The Board President. The Board President shall give his/her best effort to see that such forms are mailed, otherwise provided, or made available to every residential customer. If, however, a customer does not receive such a form, it shall be the customer’s responsibility to go to the LTG WSC offices to complete and sign the form claiming more than two (2) persons per household. New customers may claim more persons per household at the time of applying for water service on the form prescribed by The Board President. When the number of persons per household increases so as to place the customer in a different allocation category, the customer may notify the LTG WSC on such form and the change will be implemented in the next practicable billing period. If the number of persons in a household is reduced, the customer shall notify the LTG WSC (name of your water supplier) in writing within two (2) days. In prescribing the method for claiming more than two (2) persons per household, The Board President shall adopt methods to ensure the accuracy of the claim. Any person who knowingly, recklessly, or with criminal negligence falsely reports the number of persons in a household or fails to timely notify the LTG WSC (name of your water supplier) of a reduction in the number of persons in a household shall be fined not less than \$_____.

Residential water customers shall pay the following surcharges:

- \$____ for the first 1,000 gallons over allocation.
- \$____ for the second 1,000 gallons over allocation.
- \$____ for the third 1,000 gallons over allocation.
- \$____ for each additional 1,000 gallons over allocation.

Surcharges shall be cumulative.

Master-Metered Multi-Family Residential Customers

The allocation to a customer billed from a master meter which jointly measures water to multiple permanent residential dwelling units (example: apartments, mobile homes) shall be allocated 6,000 gallons per month for each dwelling unit. It shall be assumed that such a customer’s meter serves two dwelling units unless the customer notifies the LTG WSC (name of your water supplier) of a greater number on a form prescribed by The Board President. The Board President shall give his/her best effort to see that such forms are mailed, otherwise provided, or made available to every such customer. If, however, a customer does not receive such a form, it shall be the customer’s responsibility to go to the LTG WSC offices to complete and sign the form claiming more than two (2) dwellings. A dwelling unit may be claimed under this provision whether it is occupied or not. New customers may claim more dwelling units at the time of applying for water service on the form prescribed by The Board President. If the number of dwelling units served by a master meter is reduced, the customer shall notify the LTG WSC in writing within two (2) days. In prescribing the method for claiming more than two (2) dwelling units, The Board President

shall adopt methods to ensure the accuracy of the claim. Any person who knowingly, recklessly, or with criminal negligence falsely reports the number of dwelling units served by a master meter or fails to timely notify the LTG WSC of a reduction in the number of persons in a household shall be fined not less than \$_____. Customers billed from a master meter under this provision shall pay the following monthly surcharges:

- \$____ for 1,000 gallons over allocation up through 1,000 gallons for each dwelling unit.
- \$____, thereafter, for each additional 1,000 gallons over allocation up through a second 1,000 gallons for each dwelling unit.
- \$____, thereafter, for each additional 1,000 gallons over allocation up through a third 1,000 gallons for each dwelling unit.
- \$____, thereafter for each additional 1,000 gallons over allocation.

Surcharges shall be cumulative.

Commercial Customers

A monthly water allocation shall be established by The Board President, or his/her designee, for each nonresidential commercial customer other than an industrial customer who uses water for processing purposes. The non-residential customer's allocation shall be approximately __ (e.g. 75%) percent of the customer's usage for corresponding month's billing period for the previous 12 months. If the customer's billing history is shorter than 12 months, the monthly average for the period for which there is a record shall be used for any monthly period for which no history exists. Provided, however, a customer, __ percent of whose monthly usage is less than _____ gallons, shall be allocated _____ gallons. The Board President shall give his/her best effort to see that notice of each non-residential customer's allocation is mailed to such customer. If, however, a customer does not receive such notice, it shall be the customer's responsibility to contact the LTG WSC to determine the allocation. Upon request of the customer or at the initiative of The Board President, the allocation may be reduced or increased if, (1) the designated period does not accurately reflect the customer's normal water usage, (2) one nonresidential customer agrees to transfer part of its allocation to another nonresidential customer, or (3) other objective evidence demonstrates that the designated allocation is inaccurate under present conditions. A customer may appeal an allocation established hereunder to The Board President or alternatively, a special water allocation review committee). Nonresidential commercial customers shall pay the following surcharges:

Customers whose allocation is _____ gallons through _____ gallons per month:

- \$____ per thousand gallons for the first 1,000 gallons over allocation.
- \$____ per thousand gallons for the second 1,000 gallons over allocation.
- \$____ per thousand gallons for the third 1,000 gallons over allocation.
- \$____ per thousand gallons for each additional 1,000 gallons over allocation.

Customers whose allocation is _____ gallons per month or more:

- ___ times the block rate for each 1,000 gallons in excess of the allocation up through 5 percent above allocation.
- ___ times the block rate for each 1,000 gallons from 5 percent through 10 percent above allocation.
- ___ times the block rate for each 1,000 gallons from 10 percent through 15 percent above allocation.
- ___ times the block rate for each 1,000 gallons more than 15 percent above allocation.

The surcharges shall be cumulative. As used herein, “block rate” means the charge to the customer per 1,000 gallons at the regular water rate schedule at the level of the customer’s allocation.

Industrial Customers

A monthly water allocation shall be established by The Board President, or his/her designee, for each industrial customer, which uses water for processing purposes. The industrial customer’s allocation shall be approximately ___ (example: 90%) percent of the customer’s water usage baseline. Ninety (90) days after the initial imposition of the allocation for industrial customers, the industrial customer’s allocation shall be further reduced to ___ (example: 85%) percent of the customer’s water usage baseline. The industrial customer’s water use baseline will be computed on the average water use for the _____ month period ending prior to the date of implementation of Stage 2 of the Plan. If the industrial water customer’s billing history is shorter than ___ months, the monthly average for the period for which there is a record shall be used for any monthly period for which no billing history exists. The Board President shall give his/her best effort to see that notice of each industrial customer’s allocation is mailed to such customer. If, however, a customer does not receive such notice, it shall be the customer’s responsibility to contact the LTG WSC to determine the allocation, and the allocation shall be fully effective notwithstanding the lack of receipt of written notice. Upon request of the customer or at the initiative of The Board President, the allocation may be reduced or increased, (1) if the designated period does not accurately reflect the customer’s normal water use because the customer had shutdown a major processing unit for repair or overhaul during the period, (2) the customer has added or is in the process of adding significant additional processing capacity, (3) the customer has shutdown or significantly reduced the production of a major processing unit, (4) the customer has previously implemented significant permanent water conservation measures such that the ability to further reduce water use is limited, (5) the customer agrees to transfer part of its allocation to another industrial customer, or (6) if other objective evidence demonstrates that the designated allocation is inaccurate under present conditions. A customer may appeal an allocation established hereunder to The Board President or alternatively, a special water allocation review committee). Industrial customers shall pay the following surcharges:

Customers whose allocation is _____ gallons through _____ gallons per month:

\$_____ per thousand gallons for the first 1,000 gallons over allocation.

- \$____ per thousand gallons for the second 1,000 gallons over allocation.
- \$____ per thousand gallons for the third 1,000 gallons over allocation.
- \$____ per thousand gallons for each additional 1,000 gallons over allocation.

Customers whose allocation is _____ gallons per month or more:

- ___ times the block rate for each 1,000 gallons in excess of the allocation up through 5 percent above allocation.
- ___ times the block rate for each 1,000 gallons from 5 percent through 10 percent above allocation.
- ___ times the block rate for each 1,000 gallons from 10 percent through 15 percent above allocation.
- ___ times the block rate for each 1,000 gallons more than 15 percent above allocation.

The surcharges shall be cumulative. As used herein, “block rate” means the charge to the customer per 1,000 gallons at the regular water rate schedule at the level of the customer’s allocation.

Section X: Enforcement

- (a) No person shall knowingly or intentionally allow the use of water from the LTG WSC for residential, commercial, industrial, agricultural, governmental, or any other purpose in a manner contrary to any provision of this Plan, or in an amount in excess of that permitted by the drought response stage in effect at the time pursuant to action taken by The Board President, or his/her designee, in accordance with provisions of this Plan.
- (b) Any person who violates this Plan is guilty of a misdemeanor and, upon conviction shall be punished by a fine of not less than _____ dollars (\$__) and not more than _____ dollars (\$__). Each day that one or more of the provisions in this Plan is violated shall constitute a separate offense. If a person is convicted of three or more distinct violations of this Plan, The Board President shall, upon due notice to the customer, be authorized to discontinue water service to the premises where such violations occur. Services discontinued under such circumstances shall be restored only upon payment of a re-connection charge, hereby established at \$_____, and any other costs incurred by the LTG WSC in discontinuing service. In addition, suitable assurance must be given to The Board President that the same action shall not be repeated while the Plan is in effect. Compliance with this plan may also be sought through injunctive relief in the district court.
- (c) Any person, including a person classified as a water customer of the LTG WSC, in apparent control of the property where a violation occurs or originates shall be presumed to be the violator, and proof that the violation occurred on the person’s property shall constitute a rebuttable presumption that the person in apparent control of the property committed the violation, but any such person shall have the right to show that he/she did not commit the violation. Parents shall be presumed to be responsible for violations of their minor children

and proof that a violation, committed by a child, occurred on property within the parents= control shall constitute a rebuttable presumption that the parent committed the violation, but any such parent may be excused if he/she proves that he/she had previously directed the child not to use the water as it was used in violation of this Plan and that the parent could not have reasonably known of the violation.

- (d) Any employee of the LTG WSC, police officer, or other _____ employee designated by The Board President, may issue a citation to a person he/she reasonably believes to be in violation of this Ordinance. The citation shall be prepared in duplicate and shall contain the name and address of the alleged violator, if known, the offense charged, and shall direct him/her to appear in the _____ (example: municipal court) on the date shown on the citation for which the date shall not be less than 3 days nor more than 5 days from the date the citation was issued. The alleged violator shall be served a copy of the citation. Service of the citation shall be complete upon delivery of the citation to the alleged violator, to an agent or employee of a violator, or to a person over 14 years of age who is a member of the violator's immediate family or is a resident of the violator's residence. The alleged violator shall appear in _____ (example: municipal court) to enter a plea of guilty or not guilty for the violation of this Plan. If the alleged violator fails to appear in _____ (example: municipal court), a warrant for his/her arrest may be issued. A summons to appear may be issued in lieu of an arrest warrant. These cases shall be expedited and given preferential setting in _____ (example: municipal court) before all other cases.

Section XI: Variances

The Board President, or his/her designee, may, in writing, grant temporary variance for existing water uses otherwise prohibited under this Plan if it is determined that failure to grant such variance would cause an emergency condition adversely affecting the health, sanitation, or fire protection for the public or the person requesting such variance and if one or more of the following conditions are met:

- (a) Compliance with this Plan cannot be technically accomplished during the duration of the water supply shortage or other condition for which the Plan is in effect.
- (b) Alternative methods can be implemented which will achieve the same level of reduction in water use.

Persons requesting an exemption from the provisions of this Ordinance shall file a petition for variance with the LTG WSC within 5 days after the Plan or a particular drought response stage has been invoked. All petitions for variances shall be reviewed by The Board President, or his/her designee, and shall include the following:

- (a) Name and address of the petitioner(s).
- (b) Purpose of water use.
- (c) Specific provision(s) of the Plan from which the petitioner is requesting relief.
- (d) Detailed statement as to how the specific provision of the Plan adversely affects the petitioner or what damage or harm will occur to the petitioner or others if petitioner complies with this Ordinance.
- (e) Description of the relief requested.
- (f) Period of time for which the variance is sought.
- (g) Alternative water use restrictions or other measures the petitioner is taking or proposes to take to meet the intent of this Plan and the compliance date.
- (h) Other pertinent information.
